

PRESS RELEASE

PCTI & Manufacturing Advisory Committee are Making a Difference

Wayne, NJ – FOR IMMEDIATE RELEASE – Members of Passaic County Technical Institute’s (PCTI) Manufacturing Advisory Committee recently met at the high school with the goal of making a difference in the lives of staff and students. The meeting discussed opportunities for success, including employment outlook, innovative training techniques, and emerging industry standards in Manufacturing Technology.

Members of the committee also visited PCTI’s Manufacturing program to observe potential student interns for the following year. Kevin Mayer from Sandvik Coromant presented PCTI Instructor Robert Eckrote with tooling equipment. Sandvik Coromant recently hosted students from PCTI’s Manufacturing Technology program during their first ever Manufacturing Week. Students received the opportunity to visit the company’s state-of-the-art aerospace and high speed tooling training facility in Fair Lawn, NJ.

Other Manufacturing Advisory Committee members include Metal Components and Morgan Ceramics. Metal Components has employed many PCTI interns over the years and was previously honored with the high school’s Business Partner of the Year award.

With the help of PCTI and their Manufacturing Advisory Committee, students are best prepared to encounter new industry opportunities and will become skilled members of the modern workforce.
